THE STRANDING OF THE " AMA RAPOORA,"

The steamer ashore on the S.E. Promontory is as we have previously stated, the Amara poora, an iron serew steamer of 1,619 tons register, and 300 horse-nower. She was formerly owned by the British and Burmese Steam Navigation Company, and was for years engaged in the frade between Glasgow and Rangoon. The Amarapaora was an a voyage from British Columbia to Taku, with a cargo of railway ties and timber. She left Moji on the 3rd May, and here or less foggy weather we encountered until, on the morning of the 7th, the master and second officer being on the bridge, she stranded shortly before I -a.m. on the Pinnacle Rocks, about 24 miles from the S.E. Promontory light? The crew re-

mained by the ship until the morning of the With, when they landed and were taken in by the light-keepers Messrs Eccles and Johnson, by whom they were treated with every kind? ness. In fact, all the crew, officers and men, say that they cannot sufficiently express their appreciation of the great kindness shown during their week's sojourn in this isolated spot. The wreck was visited or the 10th by H.M.S. reported that Sir Mortimer Durand will aveced Algerine, which han seen sent down from to the vacancy thus created. She arrived there just before dark and her signals were fortunately made out by the people in the lighthouse, and she proceeded as clos as possible to the wrenk and anchored. One of

he Americania bouts, with the chief officer

and several men, came alongside and it was arranged that the whole of the crew, with the exception of the master and second engineer who with the managing owner and his wife. remain by the wreck, should be transferred to the Eldorado, which was effected before midnight and the ship proceeded on her veyage to Shanghai. At the time of leaving the wreck. she lind about fourteen lest of water in the holds, but it is thought that her bottom not badly damaged. She lies in a very good position, with about 24 fathoms water under her stern, and if the weather keeps fine and prompt measures for her salvage are taken, very little difficulty should he experienced in floating her, especially when the nature of her cargo is taken into consideration. About Locu ties, And already been jettissoned, leaving 5,000 in the ship, tegether with about 100 large balks of timber. The captain and owner are expected in Shanghai in the course of a day or two, as soon as Lloyds' agent in Chefoo has visited the wreck, when an official enquiry into the cause of the stranding will probably be old. The officers and crew particularly wish to convey their thanks to the keeper of the S.E. Promosfery land thouse, and to Captain Tamplin and to all our for the kindness these gen-

Throughout a considerable portion of the year the rate of exchange has ruled close upon the maximum of Is. 4d., a condition of things which in the uncertainty of the future induces depositors in India in many cases to remit their money to England. Turning to the other side of the accounts you will notice that cash in hand and at bankors, money at call, and bullion aggregate over £500,000. And this amount, combined with over £200,000 of Indian Government securities, principally sterling, shows, I think you will admit, a very strong position as against the liabilities.
